Module 4 Project: Classes and Interfaces (Part 2)

Instructions

For this assignment, you will continue Lab 4. Start with the section titled "Implementing the controller layer" and complete all coding through "Updating the HTML page". Be sure your code compiles cleanly.

There is no Canvas submission for this project, you will submit your work to a GitHub repository as described below.

Submitting your work

Once your project is complete, commit your files (source code and snip of your console output) to the provided classroom repository. Your instructor will clone and grade your repo after the due date for this assignment.

There is no Canvas submission for this project.
